### Brian S. Everitt and Torsten Hothorn

# An Introduction to Applied Multivariate Analysis with R

Springer

Berlin Heidelberg New York Hong Kong London Milan Paris Tokyo

#### **Errata**

Errata for Everitt and Hothorn (2011).

#### 1.1 List of Typos

- Table 4.1: distance SEA ATL is 2181, not 218 (corrected in data set)
- page 139:

$$\mathbf{y} = \mathbf{C} \mathbf{\Psi}_x \mathbf{f} + \mathbf{C} \mathbf{u}$$

needs to read

$$\mathbf{y} = \mathbf{C} \mathbf{\Lambda}_x \mathbf{f} + \mathbf{C} \mathbf{u}$$

and

$$Var(y) = C\Sigma C = C\Lambda_x C + C\Psi_x C.$$

needs to read

$$\mathsf{Var}(\mathbf{y}) = \mathbf{C} \mathbf{\Sigma} \mathbf{C} = \mathbf{C} \mathbf{\Lambda}_x \mathbf{\Lambda}_x^{\top} \mathbf{C} + \mathbf{C} \mathbf{\Psi}_x \mathbf{C}.$$

(spotted by Kwok P Chun)

• page 68:

$$\mathbf{R} = \begin{pmatrix} 1.0 & r \\ r & 0.1 \end{pmatrix}$$

needs to read

$$\mathbf{R} = \begin{pmatrix} 1.0 & r \\ r & 1.0 \end{pmatrix}$$

(spotted by Andreas Artemiou)

$$\mathbf{\Lambda} = \begin{pmatrix} \lambda_{11} \dots \lambda_{1k} \\ \vdots & \vdots \\ \lambda_{q1} \dots \lambda_{qk} \end{pmatrix}, \quad \mathbf{f} = \begin{pmatrix} f_1 \\ \vdots \\ f_q \end{pmatrix}, \quad \mathbf{u} = \begin{pmatrix} u_1 \\ \vdots \\ u_q \end{pmatrix}$$

needs to read

$$\mathbf{\Lambda} = \begin{pmatrix} \lambda_{11} \dots \lambda_{1k} \\ \vdots & \vdots \\ \lambda_{q1} \dots \lambda_{qk} \end{pmatrix}, \quad \mathbf{f} = \begin{pmatrix} f_1 \\ \vdots \\ f_k \end{pmatrix}, \quad \mathbf{u} = \begin{pmatrix} u_1 \\ \vdots \\ u_q \end{pmatrix}$$

(spotted by Andreas Artemiou)

• page 175  $\frac{1}{n_i}$  reads correct  $\frac{1}{n_l}$  (spotted by Philip Fowler)
